6 KEY BENEFITS OF TESTING WITH HILL LABORATORIES

WE'RE INDEPENDENT

As New Zealand's largest independent laboratory, we guarantee our customers impartial, accurate information and results, every time. Conducting business with honesty and integrity are the values which Hill Laboratories is built on.

100% KIWI

Founded in 1984 by Dr Roger and Anne Hill, Hill Laboratories remains proudly 100% NZ owned and operated today.

EXCELLENCE & EXPERTISE

Our attention to detail, focus on innovation, industry-leading quality systems, and our desire to continually improve our service has kept us at the forefront of analytical testing in New Zealand. And whilst our technology and instruments are state-of-the-art, it is the expertise of our people that really sets us apart.

COMMITTED TO EXCEPTIONAL SERVICE

With a dedicated team of expert Client Services Managers across all of our market sectors, we pride ourselves on our unwavering commitment to providing a quality customer service experience.

STRONG DIGITAL OFFERING

We have an expanding portfolio of digital tools, which operate alongside our testing services. These include our numerous mobile applications for sample collection and pre-registration, APIs, online MyLab portal for easy ordering and job tracking, and a growing portfolio of "Software as a Service" (SaaS) offerings.

ENVIRONMENTALLY RESPONSIBLE

As a 100% Kiwi-owned family business, understanding and reducing our organisation's environmental footprint is important to us. We strive to tread lightly wherever we can to run our business sustainably.

**ENSURE GOOD QUALITY
PRODUCE AND FOOD AND
COMPLIANT WITH LOCAL AND
EXPORT REQUIREMENTS.**

As some pesticides applied to food crops are potentially toxic to humans, the level of residue remaining on the food after product has been applied is under strict legislation around the world. This is known as the Maximum Residue Level (MRL) and there is an increasing number of pesticide residues now being controlled in many countries in order to protect consumers.

HILL LABORATORIES HAS A DEDICATED FOOD TESTING DIVISION AND THE ABILITY TO TEST FOR OVER 600 DIFFERENT PESTICIDE RESIDUES IN A WIDE RANGE OF FRUIT, VEGETABLES, SOILS AND FOOD PRODUCTS

We have extensive experience in pesticide residue testing, and we continue to work closely with industry groups to ensure that our tests are up-to-date with your needs and that compounds deemed important to your produce are included in our test suites.

Our Hamilton laboratory is fitted with the latest equipment and some of New Zealand's leading scientists and industry experts. This means accurate, fast and cost-effective testing combined with our exceptional customer service.

Pesticide Residue Testing Food

We have developed award winning purification systems that ensure the best possible extraction of contaminants across the most diverse array of sample types available in New Zealand. Our multi-residue suites are IANZ accredited and suitable for both domestic and export markets. Information on which chemicals are screened in our suites can be found on the technical notes section of our website.

Pesticide Residue Testing Soil

Pesticides are a valuable tool used in most agricultural systems, however their accumulation and distribution into soils can have detrimental effects. To help understand pesticide contamination, Hill Laboratories has developed an extensive array of IANZ accredited test options. A complete listing of our pesticide testing options and the associated test details is available on request.
